Solving Linear Equations (C)

Solve the following equations. Some questions will have negative, fraction or decimal answers.

Section A

- 1) $4x + 10 = 30$
- 2) $4x - 8 = 20$
- 3) $5 + 2x = 65$
- 4) $9 + 4x = -15$
- 5) $14 + 6x = 2$
- 6) $2x - 3 = -2$
- 7) $5 + 10x = -15$
- 8) $10 = 7 - x$
- 9) $-3 = 16 - x$
- 10) $-4 = 12 - 2x$
- 11) $25 = 46 - 3x$
- 12) $8 = 9 - 5x$

Section B

- 1) $\frac{x}{2} + 11 = 19$
- 2) $\frac{x}{7} - 6 = 1$
- 3) $12 + \frac{x}{5} = 20$
- 4) $3 = \frac{x}{4} - 3$
- 5) $7 = \frac{x}{2} - 4$
- 6) $-2 = \frac{x}{8} - 5$
- 7) $-1 = 6 + \frac{x}{2}$
- 8) $14 - \frac{x}{3} = 10$
- 9) $5 - \frac{x}{9} = -1$
- 10) $\frac{x+5}{3} = 12$
- 11) $\frac{x-4}{11} = 9$
- 12) $\frac{x+3}{8} = -2$

Try simulated questions and complete tests will help you get used to question formatting, identify any areas of weakness and improve both speed and accuracy. Make sure you do practical tests under examination conditions to simulate the real experience. 3) make the review fun, you can get old repeat tests. If you want to mix things up, why not try computer games with a mathematical rotation, asking a friend to test you in passages from your favorite novel, a jigsaw puzzles that challenge your abstract thinking skills. 4) try a new perspective on the test itself, if you are struggling to answer a question, do not be panic, instead, try to look at things from a new angle. reading the answers first helps you see things differently? can you eliminate answers that are definitely wrong to help you make an educated guess? 5) the schedules are fundamental at the beginning of the test, make an approximate note of how long you have to complete the test and find out how long this gives you for each question. trying to stop it will help you not get stuck to anything complicated. Remember, you can always go back to a question at the end of the test if you have time. practical fitness tests are not associated with acer. provide preparation services for acer psychometric tests. our tests were not designed to be identical to any style, employer u sector. visit to learn more. the evaluation of the 10-year numeria is a provincial evaluation that evaluates the student's proficiency in numeria. is an undergraduate requirement and students make the assessment in the year 10 of the year. the evaluation of the number of the 10th series focuses on the application of mathematical concepts learned inKindergarten matters until 10th is rie. are rie. analyze and communicate. The numeracy processes are described in the pre-assessment activities and in the specifications. Download the Parent Brochure (PDF) What Grade 10 Numeracy Looks Like The Grade 10 Numeracy Assessment is delivered online in three sections: Common section eAAAStudents answer 24 questions centred on four different tasks (situations) completed online Questions are scored by a computer. Student-choice sectionA A eAAAStudents choose two of four available questions and complete two written-response questions on paper. These questions are based on tasks the student will have completed earlier in the common section. Students present detailed solutions to a problem using all the numeracy processes and support their thinking with explanations and assumptions. Questions are marked by B.C. educators using a rubric (PDF). Self-reflection sectionA A eAAAThese questions ask students to reflect on their experience after they have completed the previous sections. The process of reflection is part of their learning. Questions are not scored. Pre-assessment Activities The following pre-assessment activities have been developed to help students prepare for the Grade 10 Numeracy Assessment. The documents and videos below are based on a situation called "Giving out Bonuses", in which the student is a store manager and must decide how to distribute a monetary bonus to employees. Workbooks Sample Situation and Questions - Giving out Bonuses (PDF) Numeracy Processes Collaborative Learning Guide (PDF) This guide provides suggestions on how students can work through problems and develop their numeracy proficiency using the five numeracy processes: interpret, apply, solve, analyze and communicate. It is based on the "Giving out Bonuses" situation task above. Students complete this activity on their own or with peers. Video Series These videos are based on the Giving out Bonuses situation.
